HARVIA

Sauna & Spa

Harvia Frosty Cold Plunge

Cold therapy to treat both your body and mind

Regularly exposing the body to cold water for short periods of time brings several health benefits such as improved immunity, stress reduction, improved sleep quality, recovery from sports and pain relief.

Harvia Frosty is a cold plunge enabling this healthy practice to be part of your daily routine.

The cooling unit cools/heats the water by approx. 8°C per hour and it is easy to keep the water at the desired temperature (lowest 4°C, highest 40°C).

Water is continuously circulated around the pool, guaranteeing an even temperature.

- Comfortably fits 2 people
- Insulated cover included
- Digital control unit for water temperature
- Two-year warranty on both the pool and cooling unit

OUR VALUES

Certikin, home to two leading automatic pool covers

Roldeck – as stylish as it is functional

The ultimate in energy saving, evaporation control and durability, the Roldeck offers a wide variety of installation options, plus of course creates an attractive finish to any pool.

Each Roldeck is made to measure for new or existing pools with the coiling mechanism installed above or below ground or in the pool itself. Touch pad type switch and remote control for easy calibration and operation, a safety lock available for new builds and the ability to interlock with the air handling system (indoor pools), are just some of its outstanding features. Rainwater will pass through the cover and not collect on the top and it, of course, minimises pool debris.

Roldeck's standard PVC slats are supported by a 5-year pro-rata warranty and come in white, blue, cream, grey, solar, and transparent (with a blue tint). The solar option, with a black base, collects heat from the sun and transfers it directly into the water, greatly reducing heating costs. The translucent slats allow under water lighting to shine through. In addition to the PVC range, there is a choice of 6 Eclipse® Polycarbonate Slats to choose from - three with solar gain, plus

the crystal-clear version and all with a seven-year pro-rata warranty. The Eclipse® range includes a special layer of UV protection, plus a new chamber design to help prevent algae formation.

Powered by a 24 volt In-Roller Motor system (negating the need for a separate motor pit) which features Formula 1 shock absorber seal technology and built-in pressure sensor and a concealed stainless steel motor driven spindle.

The Roldeck Easy Cover is an affordable option, suitable for pools up to a maximum of 12m x 6m. It is available as a solar powered or full electronic system and is ideal if space around the pool is limited, as it is supplied with slim and discreet end stands. It is easy and quick to install and is available in combination with PVC slats in the colours white, grey, cream and the full range of polycarbonate Solar Eclipse slats.

Coverstar – the gold standard in pool safety

Certikin's Coverstar is a seamlessly integrated cover system - super-easy to operate and provides maximum safety (complies with French safety standard NFP90-308) without compromising the pool's appearance.

The Coverstar system features unparalleled strength. Supporting the weight of children, pets and even adults should they accidentally fall onto the cover, it uses the exclusive Ultra Guard III vinyl composite, rather than the industry-standard vinyl, popular with other manufacturers. The high level of UV resistance offered by Ultra Guard III considerably reduces the level of colour fading compared to standard vinyl, plus it has high resistance to chlorine, acid, ozone, and other pool chemicals. Furthermore, instead of using sewn webbing (which often proves to be the weak area of the cover), Coverstar uses an exclusive patented process to heat seal the webbing, prolonging the cover's life and improving the overall quality operation. Independent tests show this process is more than twice as strong as competitors' webbing sewn to the cover. The heat-sealed webbing is also colour matched to the fabric to create a beautiful finish. There are a variety of pit toppings to choose from, including composite decking and heavy-duty pit trays in which stones can be laid, plus the Coverstar is supplied with a low-profile leading-edge bar, UK sourced power pack and UK sourced touch button key switch.

Factory trained engineers are available for installation of both the Coverstar and Roldeck covers.

Certikin is Roldeck and Coverstar's exclusive UK distributor.

Smart Pool

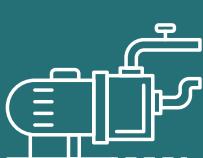

Swimming pool control system

Smart Pool delivers the ultimate integrated experience in automated control of pool equipment and operational processes.

This versatile system can be tailored to your individual needs and customised to your own swimming pool specification, providing exceptional levels of adaptability, effortless maintenance and complete peace of mind.

Smart Pool can be operated from your mobile, tablet or PC and has the option of an additional touch screen on the 'central control hub'. Designed to work with any brand of pool equipment, it offers a wide array of control, monitoring and reporting functions operated by software written specifically for Smart Pool by experts with first-hand experience in the field.

HEAT RETAINING SWIMMING POOLS

Distributed exclusively by Certikin, the UK's leading pool and spa supplier

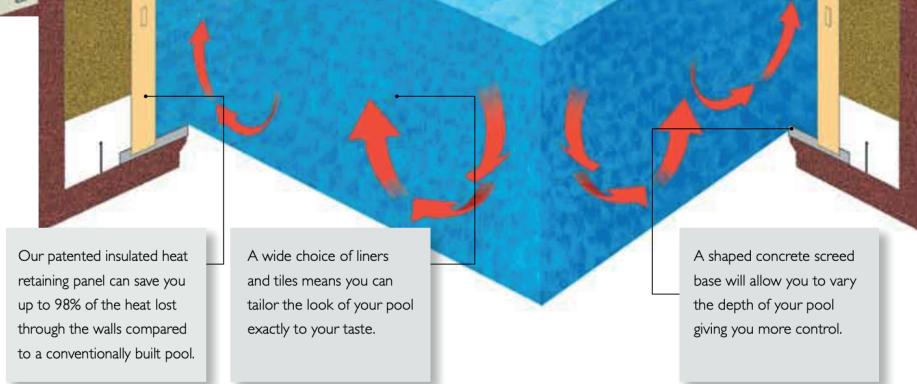

One of the laws of physics states that heat will flow from a warm body to a cold one.

All pools in the same location will lose the same amount of heat from the surface. The construction of the walls and floor will make a big difference regarding heat loss.

Our diagram opposite demonstrates the heat cycle within our insulated pool system. There are two options on offer. Our 125mm panel system is the ultimate in heat retention with the highest U values on the market whilst our 75mm panel system offers affordability and heat retention figures that rival any traditionally built swimming pool.

Read the facts for yourself.

SUITABLE FOR ALL TYPES OF PROJECTS

Whether that be indoor or outdoor, inground or partially above ground.

FULLY CUSTOMISABLE

Choose the fittings you want & where you want them to go and they will be pre-installed for you.

FAST TURNAROUND

With an easy and straightforward ordering process, your Polypool can be ready within three weeks.

QUICK CONSTRUCTION

The unique interlocking system can be used to create the pool structure within just half a day.

TRAINING AND SUPPORT

On site support on your first installation & free video call support on future installations.

UNRIVALLED HEAT RETENTION

Goes beyond the regulations for Part L compliancy with a figure unmatched by any of its competitors.

CHEAPER RUNNING COSTS

Due to its high heat retaining design, a Polypool will maintain water temperature with reduced energy usage.

Simplex add the X Factor

This infinity pool's minimalist signature looks deceptively simple but behind it is an ingenious design and a lot of hard work. And, it's brimming, top to bottom, with the best equipment a pool can get – Certikin's, of course!

A UK Pool & Spa Awards Gold winner, this concrete tiled pool, nestled in the Surrey Hills, is constructed on the side of a hill, and lets the views, and its clean lines, do the talking.

At first, uncertain as to whether his young family would use a swimming pool, the owner decided to 'test the waters' by commissioning Hayling Island-based Simplex Pools to install a Certikin 6m by 4m wooden pool in a deck surround. No stranger to doing business with Simplex, he had used the company to install pools in a number of other properties he

owns and was highly impressed with the standard of workmanship but this proved to be the start of the family's own water leisure journey. Finding that it was hard to keep the kids out of the pool, he last summer invited Simplex back to replace the wooden pool with a larger, more sophisticated structure. The owner is delighted to report, he's not looked back.

Taking just four months from start to finish, the 9.5m by 4.2m constant depth pool is topped off with a transparent, pit-mounted Roldeck cover (the blue tint allows the pool's underwater LED lighting to shine through). The Roldeck "not only looks good but, in its slickness of operation, it works like a dream."

The Roldeck is the ultimate in heat insulation, significantly reducing the amount of evaporation, it offers staggering energy savings of up to 70 per cent. Scoring high on durability

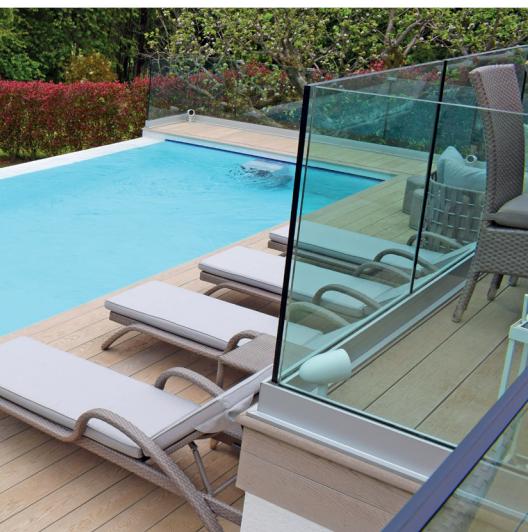

and stylish good looks, the Roldeck is ideal for new and existing pools, and has a wide variety of installation options to choose from. Each Roldeck is made to measure, with the coiling mechanism installed above or below ground or in the pool itself. High-spec features include a touch pad switch and remote control for easy calibration and operation and a safety lock. Roldeck's standard PVC slats come in white, blue, cream, grey, solar and transparent. The solar option, with a black base, collects heat from

the sun and transfers it directly into the water, greatly reducing heating costs. Powered by a 24 volt in-roller motor system (negating the need for a separate motor pit) – a high pressure motor vessel filled with nitrogen, features Formula 1 shock absorber seal technology, a built-in pressure sensor and a concealed stainless-steel motor driven spindle.

Adding an extra layer of fun, the pool is fitted with a Fastlane counter current unit. The Fastlane is made up of a remotely located hydraulic power unit that supplies hydraulic fluid to the swim unit in the pool. Simple hydraulics means that no electricity is required poolside.

What sets this market-leader apart from others is that the turbulence-free water stream it produces, is wider than the swimmer's body and deeper than any swim stroke, yet it is narrow enough not to impinge on other swimmers. Unlike jetted alternatives, the Fastlane generates a wide block of crystal clear, bubble-free and completely adjustable water flow, delivering the fastest, smoothest swim current (a necessity for any serious swimmer) available in any swimming machine.

Athletes and leisure users enjoy a current between 4:04 and 1:14 minutes per 100m, pace which can be adjusted using the remote control or with the addition of the Fit@Home app. There is also the option of a 6" high pace display. The required minimum water depth is 0.9m, making it suitable for both large and small swimming pools as it lets you swim without turning.

Certikin, the leading light in swimming pool illumination

For pool lighting, you will find no greater range than that offered by the UK's leading manufacturer and distributor, Certikin. Over the years, they have continued to develop an ever-expanding range which includes the successful PU2 mini LED light, alongside the Certikin PU9 and PU6, the most popular and reliable lights in the industry.

The company are keen to remain at the forefront of lighting design and deliver products that the industry demand. In addition to the existing stainless-steel finish, the PU2 is now available with a black fascia, ideal for pools with a darker finish. Still manufactured in stainless steel, the dark finish is achieved through the application of a hard wearing, black coating.

The range has also been extended further with the addition of a variable white LED. This gives the ability to set a specific white colour temperature, from a warm white of approximately 2900K to a cool white of approximately 5100K. In addition, the lights are dimmable between 100% and 5%.

Another addition this year is the PU3 LED range. These large LED push fit lights (177mm diameter for concrete and 199mm for liner pools) are nicheless and like the smaller PU2 range (at 72mm

for concrete and 98mm for liner pools) are available in either the stainless steel or black finish.

The PU3 lights deliver approximately 2150 lumens which is brighter than the equivalent larger PU6 light and means only one light is required for 20m². For installations of the PU2 lights, we recommend one light per 8m².

Both the PU2 and PU3 lights offer simple installation solutions with a high output and a neat finish. The concrete versions are push fit and will fit into standard 1.5" class C pipe, leaving just the stainless-steel or black fascia on display in the pool. For liner applications, the light screws into a standard Certikin inlet fitting, leaving an attractive, clean finish.

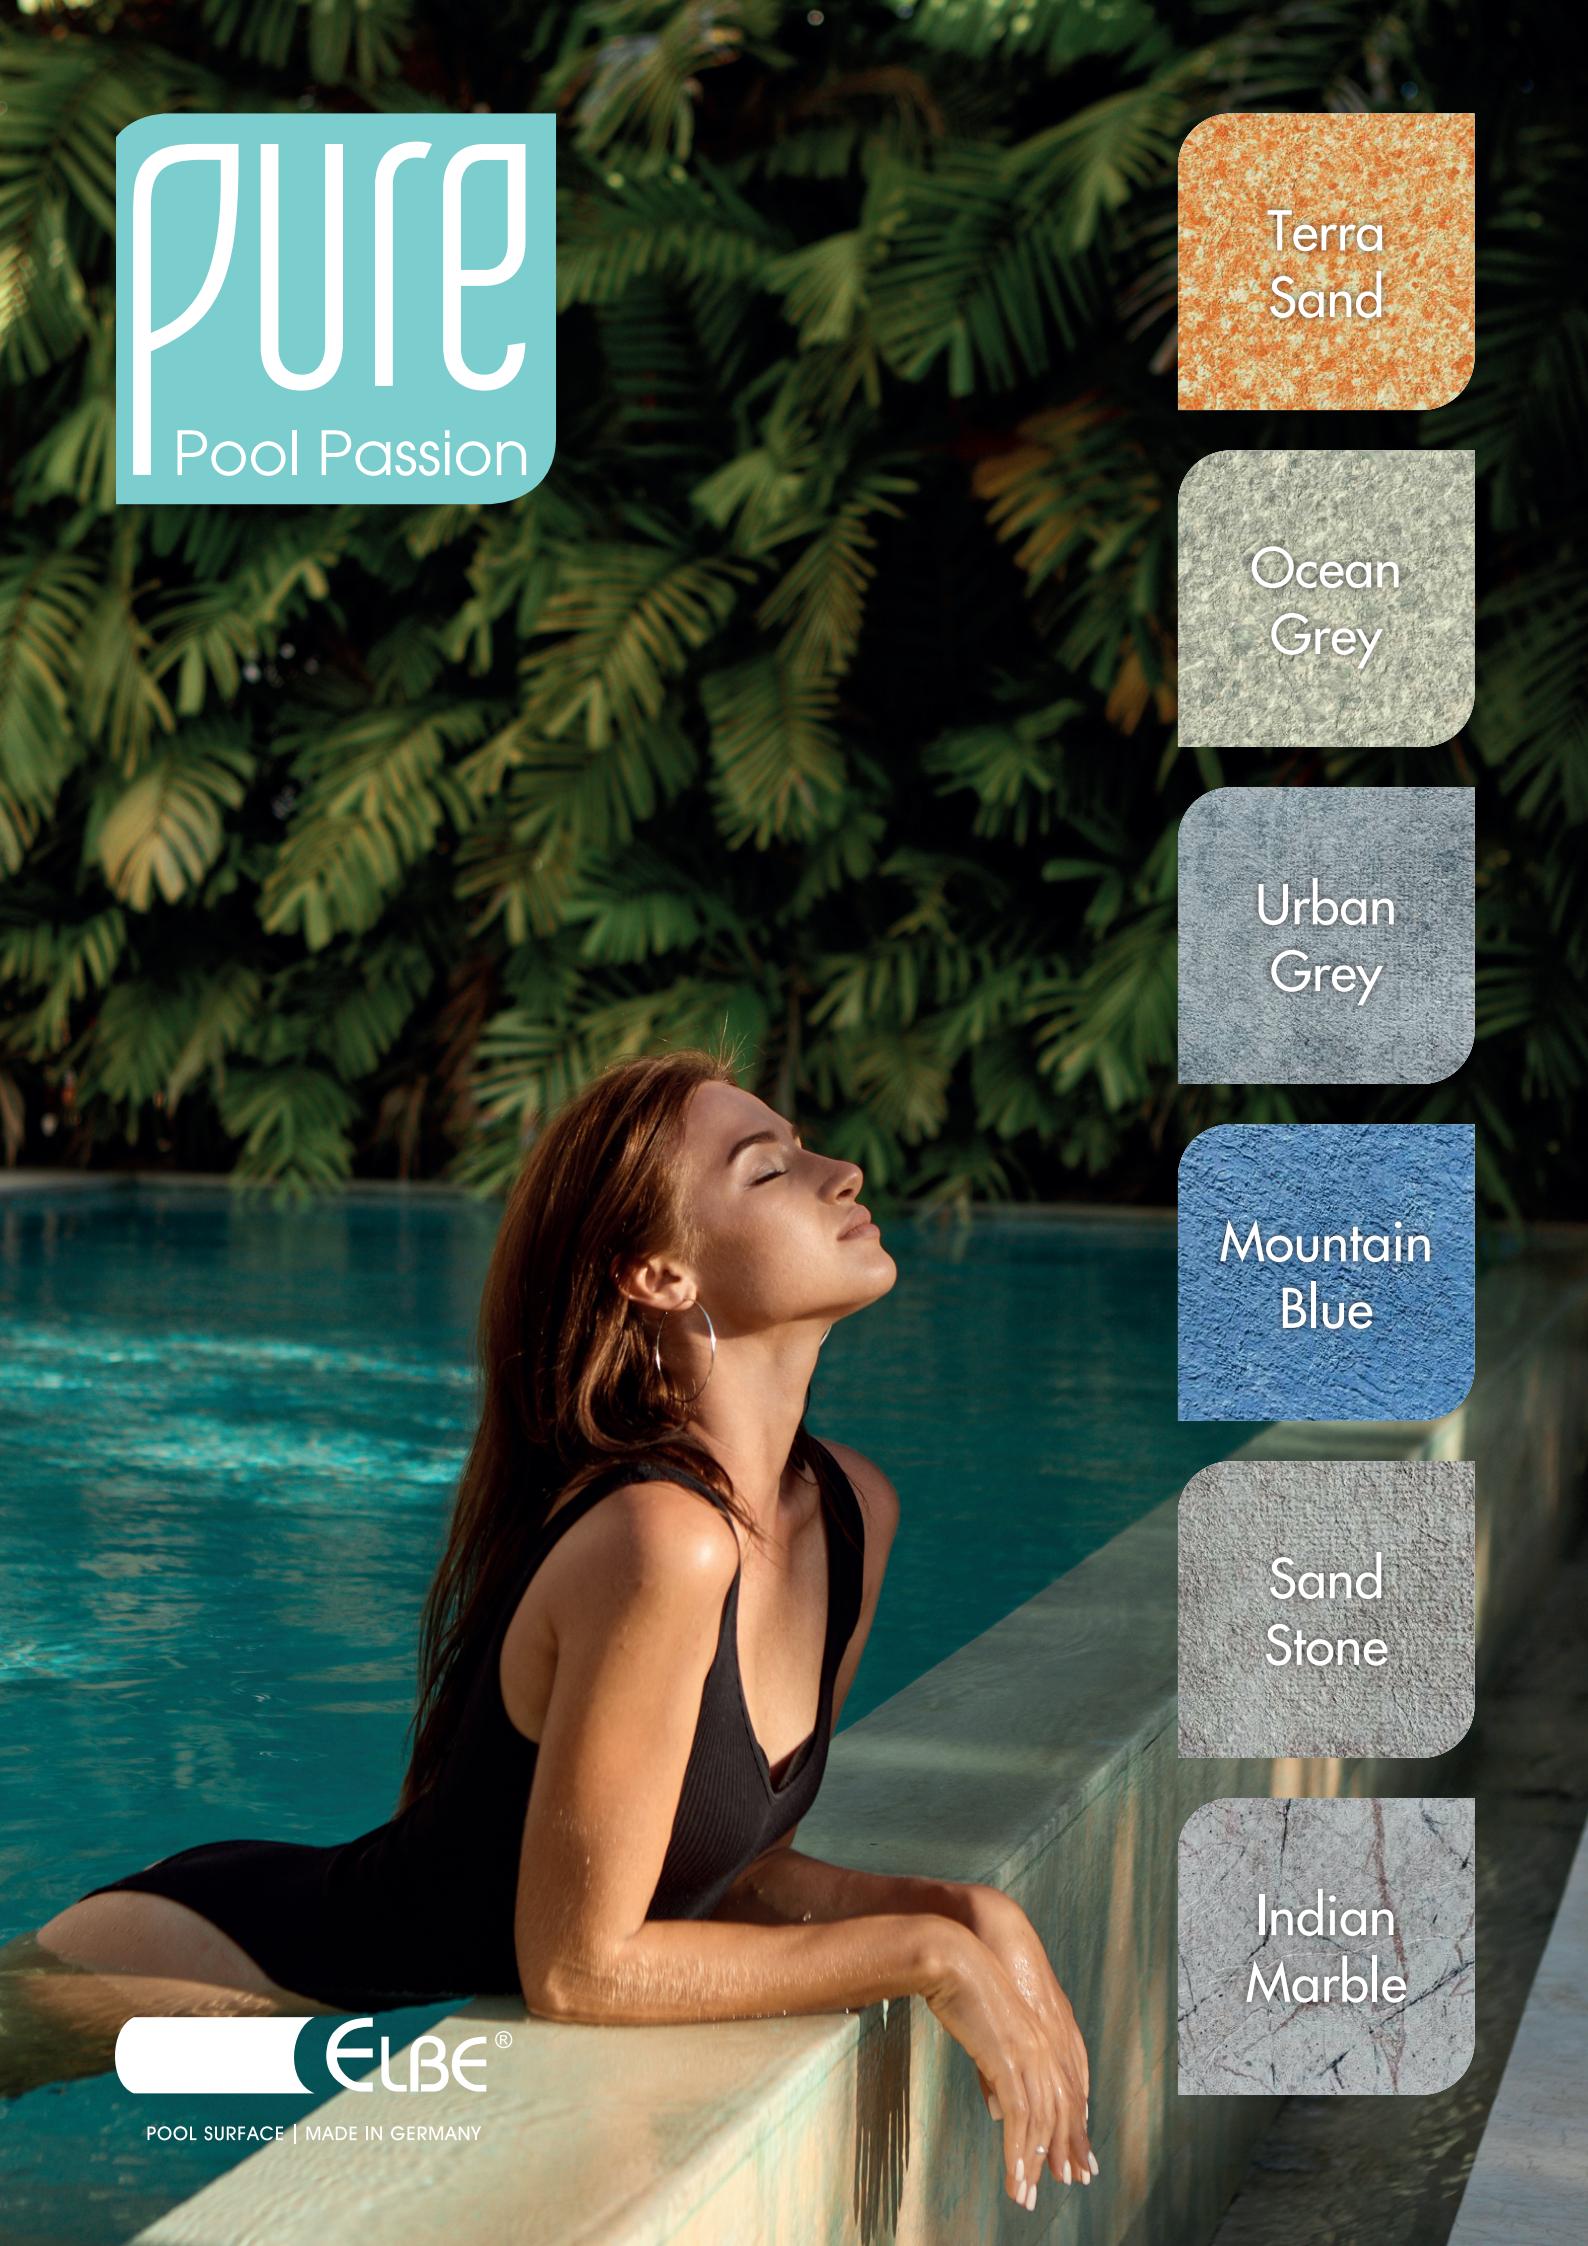

Certikin offer different LED options across both the PU2 and PU3 lights, with both ranges available in either RGBW or white, alongside the new variable white option for the PU2 range. The RGBW and variable white versions are

controllable via a smart phone using the free app, giving control over colour, sequences and brightness.

All lights are now available to order, and for concrete pools and spas they make the ideal companion to the Flolux range of stainless-steel fittings which are also available from Certikin.

POOL SURFACE | MADE IN GERMANY

Porcelain Stoneware

We are delighted to announce a new partnership with Rosa Gres porcelain stoneware, meaning we are now able to offer a complete design and manufacture solution for both indoor and outdoor pool tiling projects.

This bespoke service means we can take details of your project and, working with the team at Rosa Gres, we can produce full design visuals as well as a detailed breakdown of the stoneware required. This not only helps your clients see how their completed pool will look but also gives you an accurate cost of the materials you will need to complete the project.

The product of choice for a range of projects

At Rosa Gres, they love to create evocative, inspiring, and beautiful colours. At the same time, they focus on designing innovative solutions for the most technically demanding construction projects.

They have over 40 years' experience in the creation of complete and functional systems where each finished piece plays an essential role. The special pieces that are created are what set them apart from the competitors in terms of quality and perfection.

Rosa Gres porcelain tiles are created from natural raw materials and are fired at over 1200°C which results in a tile with almost zero porosity and high durability to make it the product of choice for a wide range of projects including pools.

The base pieces are manufactured using the pressing method to ensure the perfect size and calibre is obtained. This means, that these pieces can be installed with a narrower joint. Extrusion is used to manufacture all special pieces, steps, edges, channels, gratings, and half rounds. With this method, more robust, resistant, and longer lasting pieces can be obtained.

The unique combination of pressing and extrusion means Rosa Gres can produce both base tiles and special pieces in the same colour, creating maximum visual harmony. With more than 30 colours and textures, and a range of design options, Rosa Gres has a solution for all tastes.

Porcelain stoneware is an excellent choice for pool projects due to its numerous beneficial properties:

- 1. Waterproof:** Porcelain stoneware has minimal porosity and water absorption, making it highly durable and long-lasting in wet environments.
- 2. Extreme durability:** It is resistant to abrasion, breakage, scratching and impact.
- 3. Weatherproof:** Porcelain stoneware is not affected by drastic temperature changes, including exposure to sunlight, extreme cold, frost, or snow. This means it will retain its colour over time.
- 4. Acid resistant:** It is resistant to chemicals, making it well-suited for use in swimming pools.
- 5. Hygienic:** Porcelain stoneware is an inert and non-porous material that protects against humidity and the growth of bacteria and germs.
- 6. Non-staining:** Unlike porous materials such as wood or marble, porcelain stoneware does not absorb liquids or oils and does not retain dirt.
- 7. Easy to clean:** Cleaning porcelain stoneware is simple and requires only warm water, neutral soap, and minimal effort, ensuring it always looks as good as new.

Our partnership with Rosa Gres allows you to offer a high-quality and visually appealing solution for pool tiling projects, whilst having the reassurance that it is backed by the expertise and experience of the UK's leading supplier.

THE BEST FILTRATION MEDIA ON THE MARKET

NOW AVAILABLE FROM CERTIKIN, AN OFFICIAL DISTRIBUTOR

Producing crystal clear water, Activated Filter Media (AFM®) is the best performing filter media on the market with a certified 1-micron filtration rate which will remove about 50% more organic substances from the water than sand and other glass filter media.

Whilst manufactured from recycled glass, AFM® is different to other glass media on the market. During the production process the raw AFM® goes through a three-step chemical and thermal activation process. This activation is the reason for its 100% bio-resistance, preventing bacterial growth in the filter bed as well as its amazing filtration performance.

AFM® is a direct replacement for sand, doubling the performance of sand filters without the need for additional investments in infrastructure. It is suitable for all types of pools including natural & saltwater pools, and is available from Certikin who are now an official distributor.

Key benefits of AFM®:

- Crystal clear water
- Lower chlorine consumption
- No chlorine smell and up to 50% less THMs
- Risk of infection by bacteria and parasites such as Legionella, Pseudomonas and Cryptosporidium is reduced to an absolute minimum
- Same performance for many years with AFM® outlasting all other filter media

Certikin equipment is the backbone of a commercial pool says Buckingham Pools

When Warwickshire-based **Buckingham Pools** installed an infinity pool and wellness suite in the UK's first net-zero retirement community in Caddington, Bedfordshire, it naturally turned to their tried and trusted supplier, Certikin, for the all-important pumps and filtration.

Buckingham Pools were commissioned to design and build a contemporary level-deck indoor swimming pool with an integrated spa and fully tiled steam room. At 16.8 x 6.7m, the pool features infinity overflow edges and an air pad, back and calf-massage massage jets.

The pool's cutting edge plant room equipment includes a state-of-the-art filtration system and the highly reliable, quiet Euroswim booster pumps, ensuring optimal performance and water quality, and all supplied by Certikin.

Regardless of the aesthetic requirements of a pool, it is nothing without sparkling, clear water and that all comes down to the quality of the filtration. Buckingham Pools chose Certikin's SLX bobbin wound

GRP filtration. The SLX range of filters are the workhorse of a commercial pool and with a wide range, covering sizes from 1.05m through to 3.00m, and options for laterals and nozzles with various pressure ranges and accessories, any pool can be catered for. The standard SLX lateral version comes at 2.5 bar rating with commercial laser cut 50mm laterals making them robust for the commercial environment and all backed up with a 10-year warranty.

Richard Troman, design lead at Buckingham Pools, specified the equipment because of its recognised quality and robustness. "Our technical

specifications prioritise the integration of these components to ensure not only compliance with, but the surpassing of client expectations in terms of operational performance and water quality standards.

"As Certikin is the UK's leading supplier of premium products, service, and customer support, we naturally turned to them. With a demanding and complicated design and build project, such as this, working with the trusted UK market leader is of utmost importance."

Ordering from Certikin is simple, seamless and speedy!

Launched in 2022, the Certikin website has been designed with you, the customer, in mind. Whether it be ordering from our full range of products and spares, downloading technical information, or just reviewing past orders or invoices, you can do all of this and more.

Designed to work across both desktop and mobile devices, the website will help you manage your Certikin account whether that be from your office or whilst out on site.

All your ordering history in one easy to access place

View and download all the orders and invoices that you have placed with Certikin. Even if you have not placed orders via the website, you will still find all your orders placed by phone or email in this one convenient place.

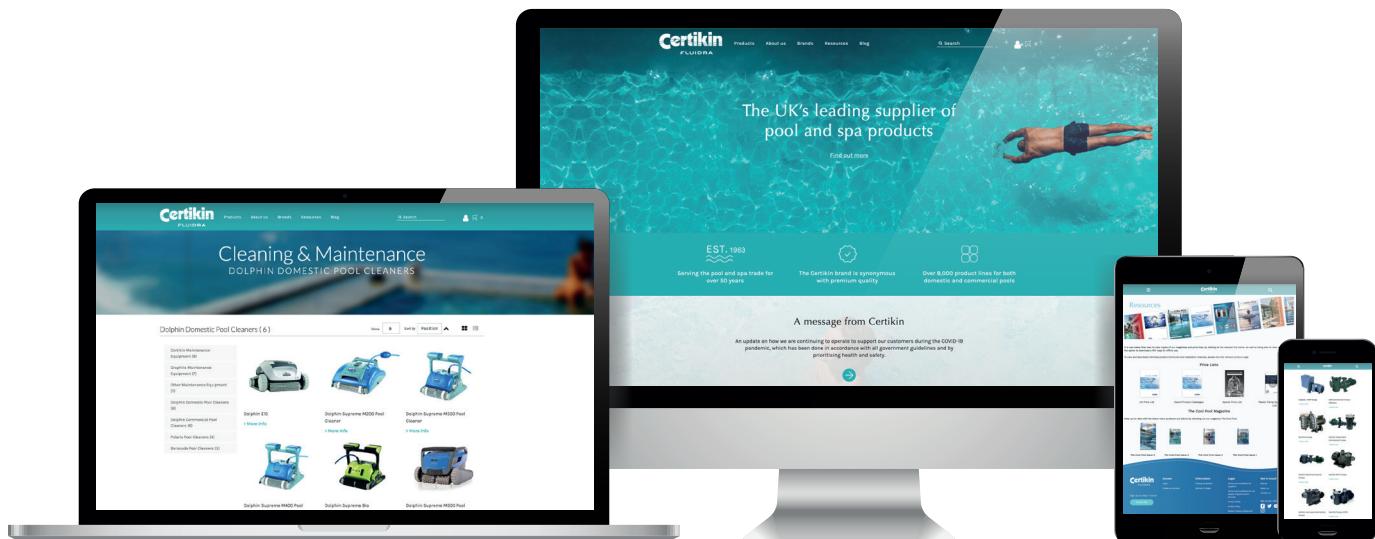

Place a quick order

If you know the SKU or product code, simply enter the code along with the quantity, and that's it, the items are in your cart ready for you to place the order. If you have several items, simply list the SKU and quantities in an Excel file and this can then be easily uploaded with a simple click.

Knowledge at your fingertips

The website gives you access to a wide range of resources to view and download at your convenience. These include product brochures, installation manuals and safety data sheets as well as the most up-to-date version of the Certikin Price List.

If you have a trade account with Certikin and would like to activate your online account, visit www.certikin.co.uk and select the option 'create an account'.

Experience the epitome of outdoor elegance with a Certikin outdoor kitchen

Certikin outdoor kitchens were conceived to provide a sophisticated high-end solution for aspirational outdoor living.

Combining luxurious sintered stone surfaces with a durable weatherproof structure, a Certikin outdoor kitchen provides the functionality and aesthetic of an indoor kitchen; with the ability to withstand the elements outdoors. Each bespoke kitchen is made in Britain, allowing you to design your dream kitchen without compromise.

Useable and hygienic surfaces

Sintered stone is non-porous meaning that mould, bacteria or stains cannot penetrate the surface, making it very easy to clean, resulting in a hygienic usable surface for food preparation.

Weatherproof structure

Carcasses are made using a high-quality weatherproof composite board guaranteed for all seasons.

Bespoke appliance housing

We create beautiful bespoke housing for outdoor appliances, like perfectly moulding the worktop around a Kamado BBQ, for example.

Convenient mains services

Our outdoor kitchens can be designed to accept gas, water and electrical services for a fully functional kitchen, outdoors.

Bespoke stone work

We will ensure that the worktops will have the minimum number of joints, if any, and can make the pattern flow across the worktops, doors and panels where possible if a veined décor is chosen.

High grade stainless steel

The appliances that we stock, including grills, sinks and taps are made with high-grade stainless steel, making them incredibly durable, ensuring good looks for many years.

Durable exterior surfaces

Sintered stone has been used for exterior cladding for over 25 years, resisting ultraviolet light and extreme temperatures without degradation. It is also highly scratch-resistant and will not warp or rot.

Internal unit options

Internally we can create shelving, drawers or an easy-access slide-out ledge for gas bottles and waste bins in door fronted units.

Carbon Neutral cladding

We can specify sintered stone produced in a carbon neutral environment, one of the most environmentally-friendly cladding materials used in architecture.

Year round al fresco cooking

A Certikin outdoor kitchen can be used all year round, particularly thanks to pergolas and outdoor heating opening up our gardens for more time in the year.

Heat resistance surfaces

Due to their high heat resistance, sintered stone worktops withstand hot items being placed directly onto the surface.

Join us on a journey to rejuvenation and relaxation with the launch of our **NEW SPA RANGE**

Welcome to Valete Spas, where the name itself embodies our commitment to well-being. "Valete" originates from Latin meaning "I am healthy," reflecting our mission to enhance your health and happiness through our luxurious hot tubs.

Crafted by Wellis, Europe's foremost spa manufacturer, and distributed by Certikin, the UK's leading wet leisure and water treatment equipment supplier, our hot tubs epitomise the perfect blend of European craftsmanship and British excellence.

Join us on a journey to rejuvenation and relaxation as we introduce you to the many benefits when you join the Valete Spas family.

The Avon Collection

Introducing the Avon Collection - a stunning array of five hot tubs inspired by the majestic River Avon. Winding its way through the picturesque Cotswolds, Gloucestershire, Wiltshire and Somerset, the river carries with it a sense of tranquillity and timeless beauty. Just like its namesake, this collection captures the essence of nature's serenity and elegance.

Each model in the Avon Collection is designed to reflect the river's graceful flow and the region's natural charm. Immerse yourself in the soothing embrace of warm, bubbling waters and be transported to a world of relaxation, where you can unwind and rejuvenate amidst the beauty of nature's inspiration.

The full range of Valete Spas are in stock and as a Certikin customer they are available for you to order.

For further details including spec sheets & pricing, contact our Spa Division
t. 01993 777200
e. info@certikin.co.uk
w. valetespas.co.uk

Alveston

The amazing six person Alveston hot tub offers incredible value for money.

Despite being the entry model within the collection, it can accommodate six adults in the five seats and full-size reclining lounger.

Evesham

With a single full-size lounger alongside seating for five people, the Evesham is one of three hot tubs in the Avon Collection that will comfortably fit six adults.

It offers a great massage experience through its 46 jets, alongside the benefits of being able to enjoy your favourite playlist via the Bluetooth music system.

Pershore

Alongside its three seats, the Pershore offers two full size adult loungers allowing you to lie back and fully enjoy the hot tub experience, including listening to your favourite music via the built-in sound system.

Whilst it is the smaller model within the Avon Collection, the Pershore hot tub it is still very spacious and luxurious and will comfortably accommodate five people. This makes it ideal for a smaller family or a couple who want to enjoy time together or with friends.

Stratford

As well as the five adult seats, the Stratford features a lounger so you can lie back and enjoy that all over hydrotherapy massage experience.

Your time in the hot tub is enhanced with the built-in sound system whilst all bathers can enjoy the full Valete Spas experience from the impressive 82 jets.

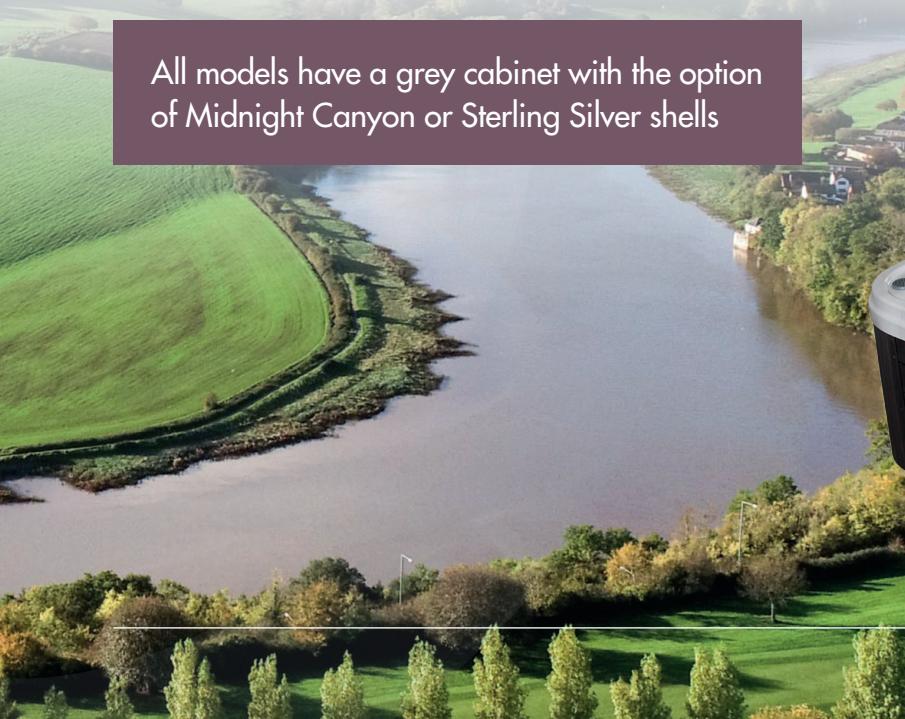

Warwick

The Warwick is the largest hot tub in the range, and with seating for seven adults, alongside the built in audio system, it is the one for those that like to entertain friends and family.

Featuring 58 jets alongside three pumps, the Warwick is a powerhouse of a hot tub.

All models have a grey cabinet with the option of Midnight Canyon or Sterling Silver shells

Bring the Finnish tradition to your next project

**ALMOST HEAVEN
SAUNAS®**

Almost Heaven Saunas have been building easy-to-assemble saunas in the Finnish tradition for over 40 years and their range of barrel saunas are now available in the UK, exclusively from Certikin.

A great addition to any home, the circular design of a barrel sauna eliminates unused air space allowing them to heat up quickly and evenly, making them hugely efficient. The solid wood construction is built to last and allows the Finnish sauna experience to be brought to any location the sauna is installed.

PRINCETON

8ft x 6ft Barrel Sauna - Suitable for 4 to 6 people

Either you are tall, you like a lot of room, or both. No matter your reason, the Princeton fits the bill! At eight feet long, the Princeton has the largest interior of our barrel sauna rooms. Measuring 6' x 8', it has enough space to let you stretch out or invite some friends over. The Harvia 8kW electric heater fires the room up to 82°C in an hour. You can also delay the start time up to eight hours; your choice. Bring the Finnish tradition to your backyard with the Princeton barrel sauna!

HUNTINGTON

8ft x 6ft Barrel Sauna - Suitable for 4 to 6 people

The Huntington offers a well-rounded traditional sauna experience: plenty of room to stretch out and enjoy the sauna heat, plus two exterior benches to cool off. Due to the canopy design, seven feet of the 8-foot-long sauna are reserved for the sauna room, while the exterior benches take up the remaining foot. The sauna space has room for up to 6 people to enjoy temperatures of 82°C. The Harvia 8kW electric heater can start right away, or you can delay the start time up to eight hours – go about your day or go to sleep and the sauna will be hot when you are ready to get in!

PINNACLE

6ft x 6ft Barrel Sauna - Suitable for 2 to 4 people

Tried and true, the Pinnacle is both a staple and a best-seller. Measuring at 6' x 6', this barrel sauna embodies “happy medium” to a T: not too small and not too big. You can stretch out on your own or invite three friends to experience the magic of sauna. Paired with a Harvia 6kW electric heater, you’ll be sweating in less than an hour as the temperatures climb to 82°C. Prefer a sauna first thing in the morning? Turn the dial and delay the start time up to eight hours while you sleep. Instant relaxation is right around the corner with a Pinnacle barrel sauna!

AUDRA

6ft x 6ft Barrel Sauna - Suitable for 2 to 4 people

Leave your worries at the door, or whilst pausing on one of the exterior benches, before entering the Audra for a refreshing sauna session. Measuring 6' x 6', this canopy style barrel can fit up to four people. When the 82°C temperatures become too hot, cool off on the exterior benches before hopping back in. Properly installed, the heater included in your sauna kit should consistently achieve temperatures of 80-85°C in 45-60 minutes. Enjoy a traditional sauna experience with up to four people in your Audra barrel sauna!

The ideal solution for protecting your pool whilst optimising the space

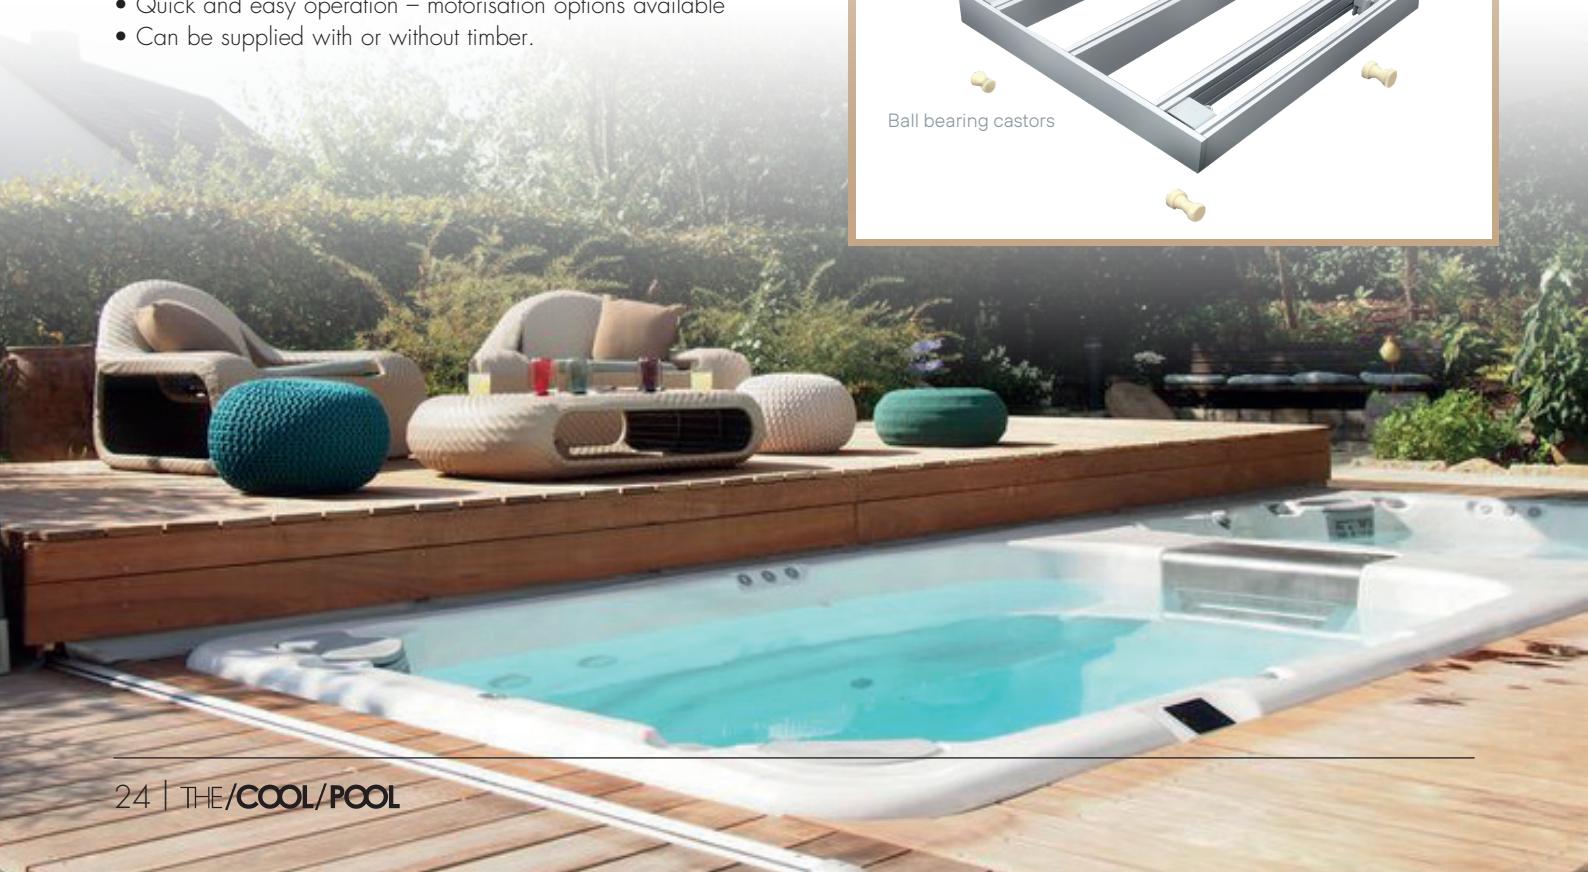

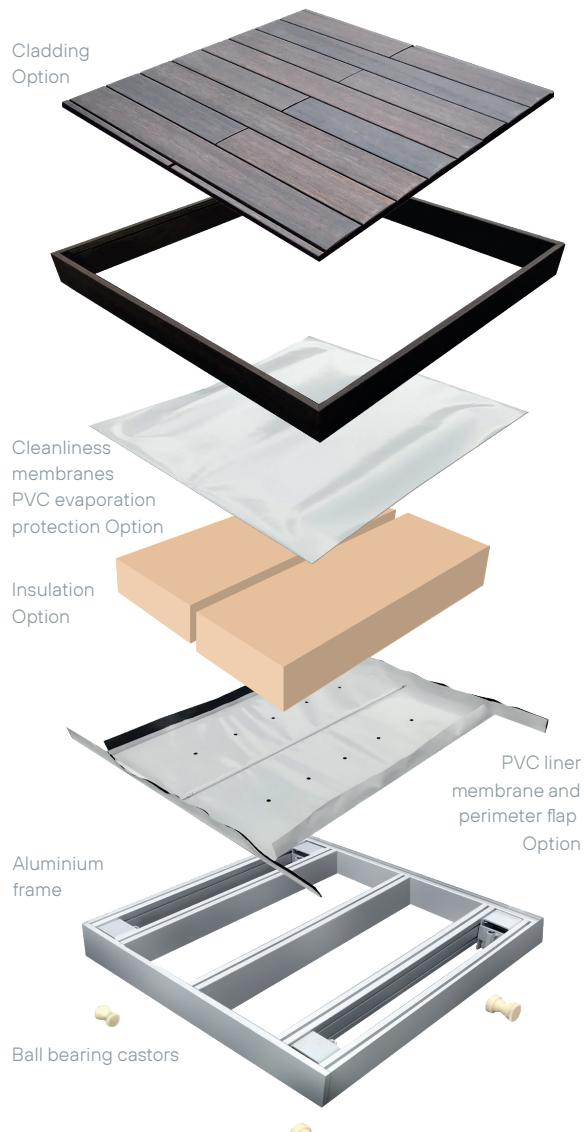

When closed, a WaluDeck cover allows you to make the most of the space around and over your swimming pool whilst at the same time serving as a safety cover, preventing heat loss, and keeping debris out.

The WaluDeck can be installed on most domestic pool shapes and sizes so long as sufficient firm, level ground is available around the pool.

The system is based around an aluminium frame which rolls along tracks on rollers with stainless steel needle bearings. The Deck closes completely and is entirely rigid with modules which roll together, fasten with a quick acting mechanism, and then lock against the track. It needs no electrical connections and is easy and quick to install – all required fixings are supplied as is, the attractive hard-wearing high-quality timber.

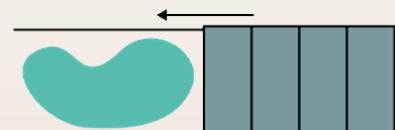

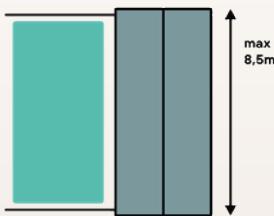

Features:

- Makes the most of your space around and over your pool
- Attractive and durable hard wood
- Suitable for existing or new build pools
- Complies with safety standard NF P 90-308
- Easy to install – no electrical connections
- Suitable for almost any shape of pool
- Prevents evaporation and heat loss
- Slows down the development of algae
- Integral PVC membrane helps keep pool clean
- Quick and easy operation – motorisation options available
- Can be supplied with or without timber.

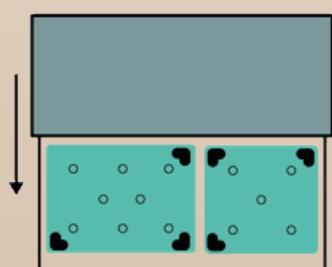

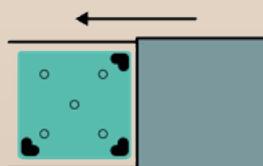

WaluDeck, a versatile deck

Several configurations are possible (depending on the dimensions of the pool)

Suitable for both swimming pools and spas

WaluDeck also adapts to all types of spas. This safe rolling decking elegantly covers your spa, integrating perfectly into the existing environment and limiting heat loss thanks to insulation positioned in the structure.

WaluDeck Origin

WaluDeck covers both pools and spas in an aesthetic way. It minimises the loss of heat thanks to the insulation placed under the wooden cover. Optional motorisation enables an easy and fast opening/closing.

Being a safety cover that can be used all year round, WaluDeck offers the best of protection while optimizing the available space. The pool becomes a playground, a place to relax or an open-air dining area!

Suitable for most swimming pool shapes and sizes!

WaluDeck FLAT

WaluDeck FLAT allows you to cover your spa or your swimming pool in an aesthetic way, while the membrane underneath the cladding and insulation will prevent heat loss (cladding and insulation optional). Both a Deck and a safety cover, used all year round, WaluDeck FLAT combines the best in protection with the most space-saving design. The pool becomes a playground, a place to relax or an open-air dining area.

An ideal covering solution for small pools and spas!

marketing initiative

THE/COOL/POOL

Spectacular Pools / "Quality needs no introduction, it speaks for itself..."

"Quality needs no introduction, it speaks for itself..."

...says Steve Preece of Warwickshire-based Preece Pools. A long-term customer of Certikin and a fan of the one-stop shop approach to buying, he's a great believer that you get what you pay for. Nestled in the rolling Warwickshire countryside, this beautiful pool is a fine illustration of why Certikin is the company's supplier of choice.

The house renovation and extension complete, the owner turned his attention to landscaping the sprawling garden. An old swimming pool had been filled in some 15 years ago but the house's new owner wanted to start afresh with a new location for a new pool.

Calling on the services of local pool installer, Preece Pools, a new site was carefully marked out but, as the plans were being drawn up, the owner was faced with an unexpected problem. The old pool had been covered and hidden in order to miss it. They only start building when it was to be complete and the on-site team were called in to do a site survey. They were shocked to find the old pool was 31m long and 10m wide, which is 10 times larger than the new one they were building.

THE/COOL/POOL

A blog powered by **Certikin**

The rest is up to us. If we select it as one of our chosen case studies (and subject to the owner's permission), we will organise our in-house photographer to visit and arrange for photos to be taken and a case study written. All will be sent to you for your approval. The whole service, from start to finish, is **FREE OF CHARGE**.

The case study will appear in **Cool Pool**, and offered to the industry trade magazines, such as **Swimming Pool News** and **Swimming Pool Scene**, for editorial use. We can even produce a glossy point of sale flyer and provide you with a set of photos for your own use.

This is a fantastic **FREE** marketing service that is too good to miss...

...and there's no catches! Are you currently working on, or have you recently completed, a stand-out installation? Then, Certikin should be your first port of call.

Where a project is a fine example of your company's expert craftsmanship, and features Certikin equipment, it makes sense that we join forces and do some joint promotion.

What's involved? From your point of view, very little. Simply email Certikin's Marketing Manager, Chris Green (cgreen@certikin.co.uk) with:

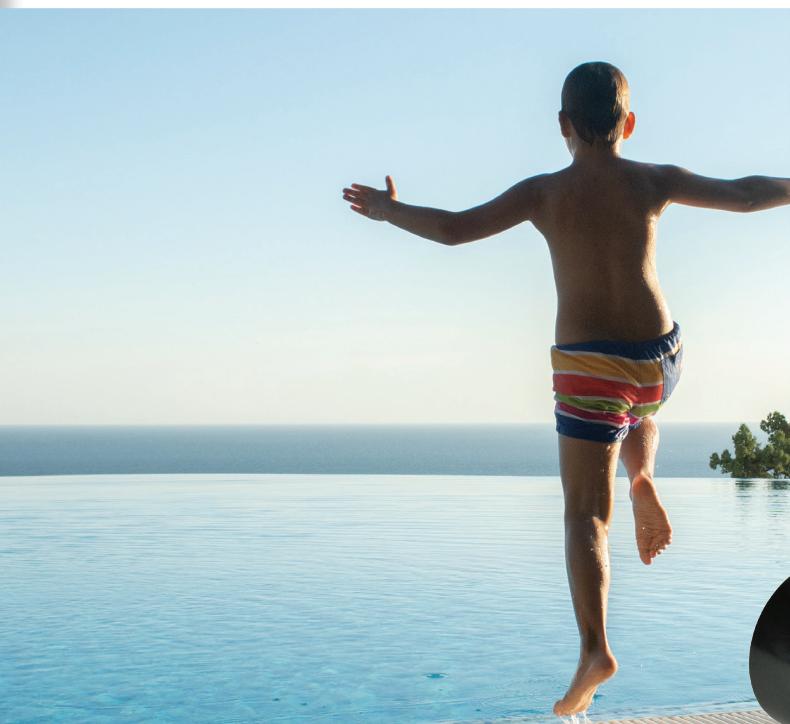

1. Details of location
2. Certikin equipment used
3. Date of completion
4. Where possible, but not essential, some images (it doesn't matter if they are low resolution at this stage)

We look forward to hearing from you.

*Subject to available space in the magazine.

FLOWVIS®

Flow Meters

KNOW THE FLOW.™
MAXIMIZE THE EFFICIENCY.

Your swimming pool's **speedometer!**

Ingenious in concept and flawless in operation, FlowVis® has been revolutionizing the way pool owners and operators measure flow since its inception in 2012.

With unrivalled average accuracy and greater installation flexibility than any other brand, it's easy to see why Flowvis® is the pool & spa industry's flowmeter of choice.

- Maintains accuracy even with air in the system
- Will not stick, bounce, or provide inaccurate readings of flow
- Can be installed right next to other fittings with zero effect on accuracy
- Can be installed horizontally, vertically or even upside-down!
- Incredibly robust, and designed with a 15+ year lifespan

Every Great Pump Deserves A Great Flow Meter

Installing a variable speed pump for energy savings makes complete sense, but the only way to know where to set the pump's speed is by knowing the flow rate. Establishing the required flow rate also allows the user to achieve turnover requirements; setting the flow rate too high will use more energy than required and setting it too low will result in a dirty pool.

Flowvis® Digital... This means more!

FlowVis Digital is the next level in flow meter technology and is the first >98% accurate digital flow meter developed for pools and spas. It is available for new and existing FlowVis installations and retrofit models can be installed quickly and easily. FlowVis Digital has the ability to interface with other systems such as heaters, chemical feeders and UV units, so they will only operate above a user-defined flow rate.

HARVIA

Sauna & Spa

Harvia Sauna Cabins Relax - and enjoy the healing heat!

ENJOY

More and more people around the world are recognizing that the sauna is not only a place for peace, relaxation, and socialization – but also a practice which promotes health and well-being.

Sauna bathing as a traditional healing method is supported by numerous scientific studies and continues to be a hot topic within the wellness movement.

Make your sauna an oasis of well-being

Harvia want to create new, relaxing sauna experiences in the midst of hectic everyday life. There you can find harmony of body and mind – on the sauna bench, in the gentle embrace of heat and steam.

Harvia offers everything your sauna needs.

They will provide you with everything you need for designing and building a sauna – with more than 70 years of

experience. In addition to indoor sauna models, you can find sauna heaters, safety equipment and sauna accessories.

VENTURA

The Harvia Ventura sauna cabin is our modern flagship sauna cabin with a versatile material selection and easy-to-assemble structure. The streamlined design of the Ventura sauna is eye-catching and provides the ultimate sauna experience.

Features:

- Easy installation
- Enhanced PIR insulation
- Versatile material selection (Ventura panels always inside the cabin)

- Streamlined look with full glass front and enhanced Ventura panels
- Measures and lay-out easily modifiable
- Available as a hybrid sauna

HEALING WITH HEAT

Sauna's heat is good for the heart

Taking 2–3 sauna baths per week is enough to lower the risk of cardiovascular disease by 20% compared to those sauna bathing only once a week. The risks may decrease by up to 65% the more one sauna bathes.

Laukkanen, Khan, Zaccardi & Laukkanen 2015

Sauna bathing improves sleep quality

A study investigating the connection between sauna bathing and sleep saw a 70% increase in deep sleep during the first two hours and 45% increase in six hours. There was a statistically significant decrease in the participants' staying-up time after sauna bathing.

Putkonen & Elomaa 1976

Sauna bathing is exercise

The heat of the sauna makes the heart pump blood faster, expanding the blood vessels and relieving the heart.

Brunt, Howard, Francisco, Ely, Minston 2016

FENIX

The Harvia Fenix sauna is an ode to ancient sauna culture. The dark design is inspired by the traditional smoke sauna, with light benches adding a modern edge to the look.

Harvia's Fenix prefabricated saunas are equipped with a large, impressive glass wall. With the optional RGBW LED lights, you can easily create a different atmosphere in the sauna, making each experience unique and new.

Features:

- Element cabin made of black treated spruce
- Roof element with roof rim
- Formula sauna interior made of aspen wood
- 1 x 600mm bench and 3 x 500mm benches
- Ventilation slit, backrests and intermediate bench panel included
- Optional RGBW led lights
- Layout can be installed in right or left orientation

Sauna bathing improves memory

Sauna bathing twice a week decreases the risk of dementia by one fifth compared to those sauna bathing only once a week. The risk is up to 60% less for people sauna bathing 4–7 times a week.

Laukkanen, Kunutson, Kauhanen & Laukkanen 2016

Sauna bathing cherishes the skin

The heat of the sauna multiplies the amount of blood pumping through superficial veins, which boosts the skin's metabolism. The skin feels nourished, maintains moisture and stays soft and elastic.

Viinikka 2020

Sauna bathing treats muscles

Sauna is a great place for relaxing tense muscles. However, sauna bathing before exercise prevents muscle pains and increases muscle mobility afterwards.

Khamwong, Paungmali, Pirunsan & Joseph 2015

BLOCK

The Harvia Block sauna cabin is custom made to match your desire. Thanks to the innovative structure, the Block sauna is extremely easy to assemble. We combined the finest materials with a revolutionary structure to guarantee your relaxation before and after heating up your sauna.

Features:

- Block sauna cabins can be tailored to fit your premises and taste. In addition, there are two standard sizes available
- Extremely fast installation
- Mix and match the panel of your choice (alder, aspen, heat-treated aspen, or heat-treated brushed alder). Spruce is available for nonvisual surfaces
- Open and spacious feeling with high quality black framed tempered glass. Improve your sauna's look with one or two glass corners
- Enhanced insulation
- Additional RGBW Led lights in horizontal or vertical orientation
- Available as a hybrid sauna

Relax and enjoy your pool with Dolphin automatic suction pool cleaners

Eliminate the hassle for the ultimate clean

Dolphin M250

Discover an Exceptional Experience

Thanks to this basic Dolphin M250 cleaner, a minimum investment is enough to enjoy effective cleaning of the floor and walls of the swimming pool, including hard-to-reach corners where the floor and walls meet.

- Designed to be easy to handle and lift
- Lightweight design makes pickup a breeze
- CleverClean™ scanner for maximum cleaning coverage for your pool
- Stand for easy storage & handling
- Actively cleans and scrubs away algae and bacteria
- Tangle free cable, keeps it safe, clean, and simple

Dolphin M550

Superior pool cleaning made even easier

When it comes to scrubbing and filtering, the Dolphin M550 is a powerful machine. Featuring intense scrubbing action and superior waterline scrubbing capabilities, the Dolphin M550 delivers unmatched cleaning results. Thanks to the MyDolphin™ Plus app, the Dolphin M550 remains constantly connected, empowering you to control your cleaner effortlessly from anywhere at any time. Its simple operation and user-friendly handling eliminate the complexities of pool cleaning. New for 2024, the Dolphin M550 features advanced technologies, to give the best pool cleaning performance.

- For pools up to 15m giving cleaning coverage of floor, walls and waterline
- Top access multi layer filter basket for rough, fine and ultra fine dirt
- 18m tangle free cable with innovative swivel technology for nimble and smooth movement
- Pick Up Mode - conveniently waits at the edge of your pool for quick and easy removal
- Customise your weekly schedule cleaning times to fit your needs

LIBERTY™ 400

Cordless Pool Cleaning **THE DOLPHIN WAY!**

Dolphin Go Cordless

Let the **LIBERTY™** do the work

The New Generation of Cordless Pool Cleaning

Discover the Dolphin LIBERTY 400 with its new cordless design for unmatched agility, and inductive charging. The LIBERTY 400 "Eco Mode" will keep your pool clean all week long with short and efficient cleaning cycles. While the "Cycle Selector" will let you choose between floor-only or floor and walls cleaning, you can use the Click-Up™ for super-easy removal from the pool.

The LIBERTY 400 also includes the MyDolphin™ Plus app for easy control and cleaning programs setup.

Using powerful, intensive scrubbing action and a superior filtration system, you can get the same reliability and service you get with other Dolphin products – now cordless!

- Inductive Charging – Magnetic Connect for super easy snap-in-place and walk-away charging
- Eco Mode – Keeps your pool clean with 3 x 30 minute cycles a week *floor only
- Click Up™ – With this ingenious device, the cleaner will return to you for easy removal from the pool once the cleaning cycle is complete
- MyDolphin™ Plus app – Setting customized cleaning programs is now easier using your mobile device

Inductive Charging

Magnetic Connect for super easy snap-in-place charging

Active Scrubbing

Delivering an unmatched powerful cleaning performance

Wall Climbing

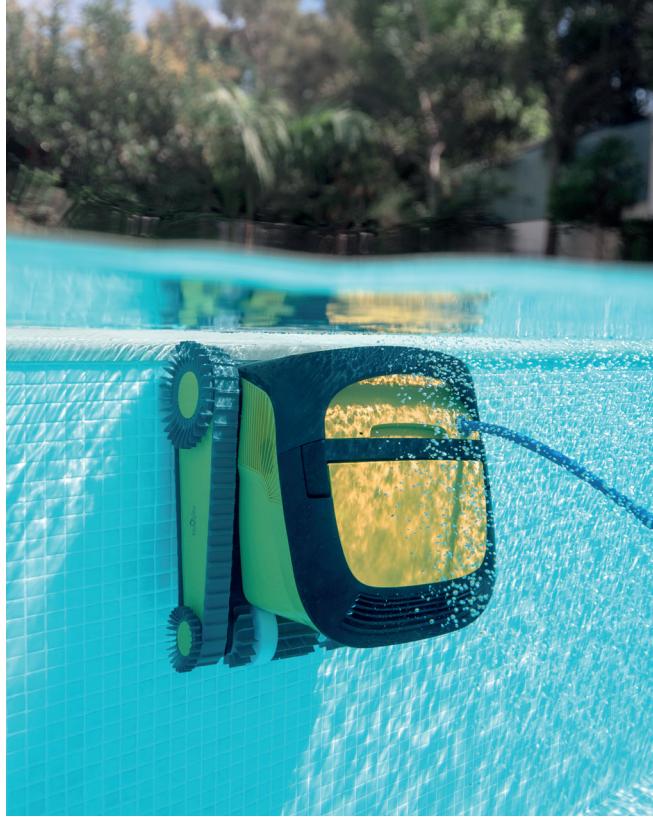

Provides floor and wall coverage, making your whole pool exceptionally clean

Quick Water Release

Releases water quickly for easy removal from your pool

WAVE 90i

The Trusted Name in Commercial Pool Cleaners

Powerfully built to fight even the toughest dirt. The all-new Maytronics Dolphin WAVE 90i is an revolutionary, app operated, commercial robotic pool cleaner.

This newly designed cleaner, engineered with groundbreaking technologies, ushers in a new era of ease and comfort, delivering maximum pool cleaning performance for mid-size commercial pools of every shape and type.

With the MyDolphin™ Plus app, the WAVE 90i is always connected, giving you the power to control your pool cleaning from anywhere, at any time.

- Dual direction brush with side-brushes
- MyDolphin™ Plus App Operation
- Cycle Selector to fit your needs
- Tangle free cable keeps it safe, clean and simple
- Floor and walls cleaning
- Top load filter access for supereasy cleaning

MyDolphin™ Plus App Full control, from anywhere at anytime

Complete control of your Dolphin pool cleaner from your mobile device.

Select Between Cleaning Modes

Set cleaning cycles for weekly, daily, or specific times, to suit your pool state and your schedule.

Call Your Robot to the Waterline for a Pick-Up

Use the Pick-Up mode on your MyDolphin™ Plus app to tell your Dolphin to climb to you for easy retrieval from the pool.

Set a Weekly Cleaning Schedule

The Weekly Timer feature enables you to set an automatic cleaning schedule for the week ahead.

Manually Drive Your Robot

Drive your Dolphin around the pool for specific spot cleaning or pure fun!

Use Voice Control to Operate Your Dolphin

Set Siri® shortcuts for handfree control of your Dolphin.

Filter Status Indicator

See your Dolphin filter's status without pulling it out of the pool.

Wellis® Holiday Let Spas

Now available from Certikin

Boost holiday park bookings with our HSG282 compliant hot tubs

Whether you own a holiday park, glamping site or run any form of holiday accommodation, guest satisfaction is the number one priority. And what better way to enhance the experience than by adding a hot tub.

As part of our extensive wellness range, we are now pleased to offer a range of spas designed specifically for the holiday let market. The range of four stunning hot tubs don't just comply but some exceed the all-important health and safety HSG282 requirement enforced by HSE and Local Authorities.

Manufactured by Europe's leading spa manufacturer, Wellis®, the spas are in stock at Certikin ready for you to order.

Meeting the HSG282 Requirements:

- Filtration System: Ozone generator
- Filtration Duration: 24 hours
- In-line chemical dosing system: Spa Frog
- No perishable items fitted: No headrests, diverter or air valves
- Chlorinator: Fitted as standard to ensure pH levels are correct

Exceeding the HSG282 Requirements:

- Fast drain valve: Drainage time reduced to 9 -10 minutes
- Reduced heating time: 1.5 – 4.5 hours
- Tamper proof spa controls: 2 – 3 button spa control panel
- Smartphone app and Wi-Fi: Control up to 100 spas

HSG282 is regulated by the HSE and BISHTA, then enforced by the HSE and Local Authorities.

The **Sevilla Plug & Play Holiday Let Spa** was specifically designed with exceptional durability and easy-to-use operation. This premium 13Amp hot tub is HSG282 compliant and equipped with 46 hydrotherapy jets, tamper proof controls and central LED colour-therapy lighting. Due to its low power consumption, it operates energy-efficiently – a perfect solution for parks with limited electricity supply.

The **Cordoba Holiday Let Spa** is designed for 6 people, comes with 40 hydrotherapy jets, StarLight™ corners, Smartphone App with WIFI connection and Central LED colour therapy lighting. The Cordoba exceeds HSG282 compliance standards.

The **Porto Holiday Let Spa** provides everything for 4 people, including 30 hydrotherapy jets, StarLight™ corners and Central LED colour therapy lighting. Despite its small size the Porto is an incredibly comfortable and beautifully designed spa.

The **Valencia Holiday Let Spa** with its 48 hydrotherapy jets was designed to provide entertainment and relaxation for a larger group, as many as 7 people can enjoy the hydromassage experience offered by this premium hot tub.

Wellis®
SWIMSPAS

Enjoy the therapy of a hot tub alongside the benefits of water exercise.

WATERCO
EUROPE

water, the liquid of life

Waterco Aquamite & Supastream Pumps
Expansion of our leading pump range with these two popular pumps from Waterco.

Waterco SMD & SMDD Filters
High performing filters for commercial installations.

CERTIKIN TOOK CENTRE STAGE at the busiest SPATEX to date

With SPATEX 2024's largest stand, Certikin's presence was easy to spot. Centrally placed, and surrounded by three smaller, equally eye-catching satellite stands, many visitors made the UK leading supplier's 'village' their first port of call.

Up close and personal

The clever design of Certikin's four stands offered visitors the valuable opportunity to view, touch and feel, at their leisure, the plethora of new 2024 innovations. For Certikin, this is what SPATEX is all about: "We are great believers in face-to-face business," says Marketing Manager, Chris Green. "No telephone call or online order is a substitute for being able to see a product up close and discuss its merits with a member of our technical team. Accessibility and the space to demonstrate a product's USP, are always uppermost in our minds when we design our stands.

"Our on the road sales executives do an excellent job of bringing Certikin to our customers but there's a limit as to what they can showcase. SPATEX is the only date in the industry's calendar

when customers can meet the wider team and get a greater appreciation of the diversity and range of the company's extensive portfolio."

Certikin, along with SPATEX's hundred plus other 2024 exhibitors, was rewarded with a vibrant, busy show on all three days. Celebrating its tenth anniversary of hosting at Coventry Building Society Arena, the exhibition's visitor numbers were almost 20 per cent up on the previous year.

There is no larger industry audience for launching a new product than SPATEX and amongst a plethora of Certikin launches causing a stir were the new patterned and coloured liner pool fittings. Specifically tested and developed for swimming pool conditions, they are available to complement three of the best-selling liner patterns – Riverstone, Blue Marble,

and Sublime. With each pattern, the full range of fittings is available including inlets, main drain and light fascia ensuring the ultimate seamless pool liner finish.

Visitors to Certikin's main stand then migrated to the three smaller stands: Calorex H&V equipment; Autocovers (Roldeck and Coverstar), liners and covers; and an Outdoor Living stand, showcasing the beautiful Valete Spa range, launched last year, and a stunning, bespoke outdoor kitchen.

Exhibit, educate and engage!

Not just an exhibition, the show lived up to its promise to educate and inform, with the ISPE technical workshops and a parallel seminar programme registering a record number of attendees.

The industry's main associations, such as PWTAG (Pool Water Treatment Advisory Group), RLSS (Royal Life Saving Society), IOS (Institute of Swimming), were all out in force. The STA (Swimming Teachers' Association) chose SPATEX to kick off its Swim to the Beat campaign for the second year running. Raising valuable

funds for the British Heart Foundation, swimmers were put through a series of aquatic exercises.

The traditional SPATEX Networking Party was well attended, with the free, 'very useful' SPATEX baseball caps, handed out to all party attendees, proving highly popular and a nice reminder of the show.

SPATEX Organiser, Michele Bridle, says: "I'd like to extend a big thank you to Certikin, and all our wonderful exhibitors and visitors, in rewarding us with the best show to date. I am proud that those

three SPATEX days in Coventry each year unite the industry and prepares it for the pool season ahead. This 28th edition really did have it all and has spurred the team into creating something even more special in 2025. Onwards and upwards!"

Summing up the show's three days, Chris says: "Once again, SPATEX delivered for us. A huge thank you to Michele and the team, we're already looking forward to 2025!"

BESGO
+ SWISS QUALITY

BESGO Automatic Valves

Automatic backwash valves that automate your sand filter backwashes in an efficient, simple and safe way.

BESGO valves benefits:

LOW PRESSURE DROP: Offers higher backwash velocity & efficiency than traditional 6-way valves.

HIGH INSTALLATION FLEXIBILITY: Can be fitted directly on the filter or mounted on a wall (90° rotating connections)

VERY SAFE TO OPERATE: The valve returns automatically to "Filtration mode" in case of electrical failure.

ADAPTED TO ALL SAND FILTERS - UP TO 2 METERS IN DIAMETER: Valves available from DN40 (50mm) to DN125 (140mm)

SWISS MADE: High quality product providing outstanding reliability. TÜV Rheinland certified / GS mark (Tested safety).

FAST SWITCHOVER: The filtration pump does not have to be stopped during the switchover.

LEVEL WATER

CHANGE LIVES
WITH THE POWER
OF SWIMMING

WWW.LEVELWATER.ORG

The provision of swimming teaching and pool facilities for children with disabilities are two of the biggest and most pressing challenges in sport. The water takes your weight; it's a true leveller. It relieves pain and offers freedom and independence that many of our children never experience elsewhere.

Our swimmers learn strength, mobility and coordination which help with physicality out of the water too. They develop confidence, resilience and self-esteem, which can change their path in life. They learn to be strong and confident swimmers.

Everyone should have the opportunity to learn to swim and fall in love with the water. So we work in partnership with pools and swim schools around the country. We train teachers and help with funding to offer high-quality one-to-one lessons to children with disabilities.

OUR MISSION

We give children with disabilities the opportunity to learn to swim. From physical development to social and emotional confidence, swimming is a vehicle to change their lives for the better. To make this happen and create long lasting impact, we know it can't be done in isolation.

Level Water unites and collaborates with teachers, families, fundraisers, pools, supporters, governing bodies – and children with disabilities. We help the whole industry to share this mission.

OUR VISION

Our goal is to kickstart a love of swimming in children with disabilities. A love that acts as an example of everything that life can offer them, starting from that very first splash. We see a future where all children benefit from physical health that's matched with a mindset of optimism and positivity, of going for it and seeing what's possible in life.

Starting with our specialist swimming lessons, we create opportunities for children with disabilities and their families. We are agents of change, to ensure that all children have a great start in swimming and develop a lifetime of love for the water.

TRULY GLORIOUS WILD SWIMMING EVENTS

Outdoor swimming events that connect you with some of the most beautiful stretches of water in the country.

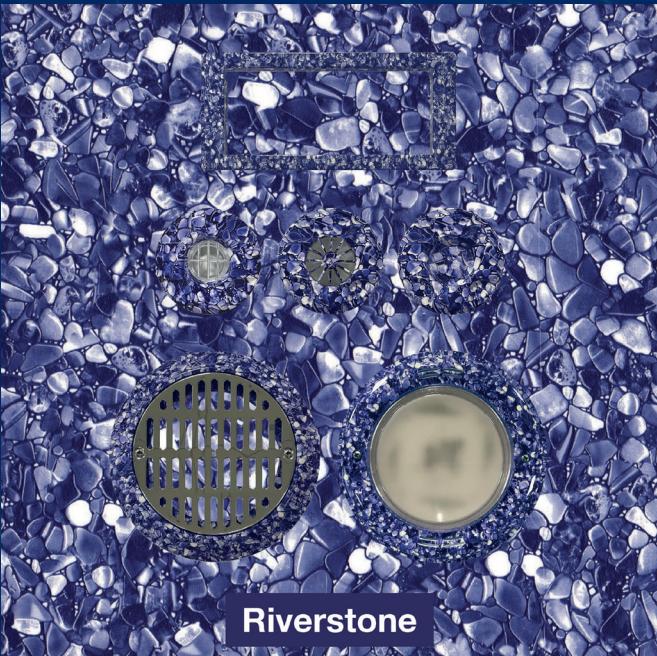

Experience a true sense of belonging. A feeling of being at one with the water, with nature and the world around you. Wild swimming is a personal journey, so we've created a series of glorious outdoor swimming events to suit everyone.

All of the money raised and profits from our events go towards 1-1 swimming lessons for children with disabilities across the UK. Learn more about our swimming lessons at www.levelwater.org.

THE ULTIMATE SEAMLESS POOL FINISH

With Certikin's new range of fittings you can now get the perfect match to complement our best-selling liners

Certikin's new pool fittings make a big splash at SPATEX 2024

Launched to much acclaim at SPATEX 2024, the new range of liner fittings from Certikin allow you to create the ultimate seamless pool finish.

Pool fittings play a vital role in ensuring that a swimming pool functions seamlessly and traditionally these fittings have been white in colour which does not always complement the overall design of the pool. However, with our new range of patterned fittings you can now get the perfect match.

Specifically tested and developed for swimming pool conditions they are available to complement three of our best-selling liner patterns – Riverstone, Blue Marble and Sublime. With each pattern, the full range of fittings is available including inlets, main drain and light fascia ensuring the ultimate seamless pool finish for your next liner pool project.

In addition to the patterned fittings, we have also added our new mid blue and dark blue fittings to the range alongside our existing black and grey fittings. These

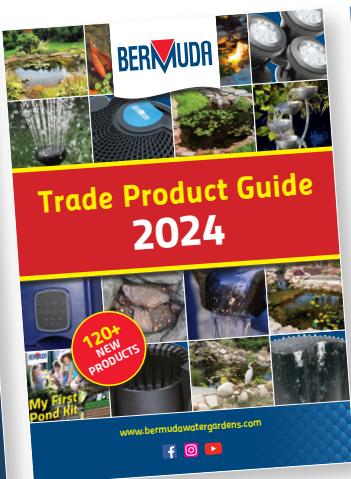

new fittings have been designed to blend in with a variety of liners including Persia Blue, Blue Marble, Mosaic and Gemstone Light Blue.

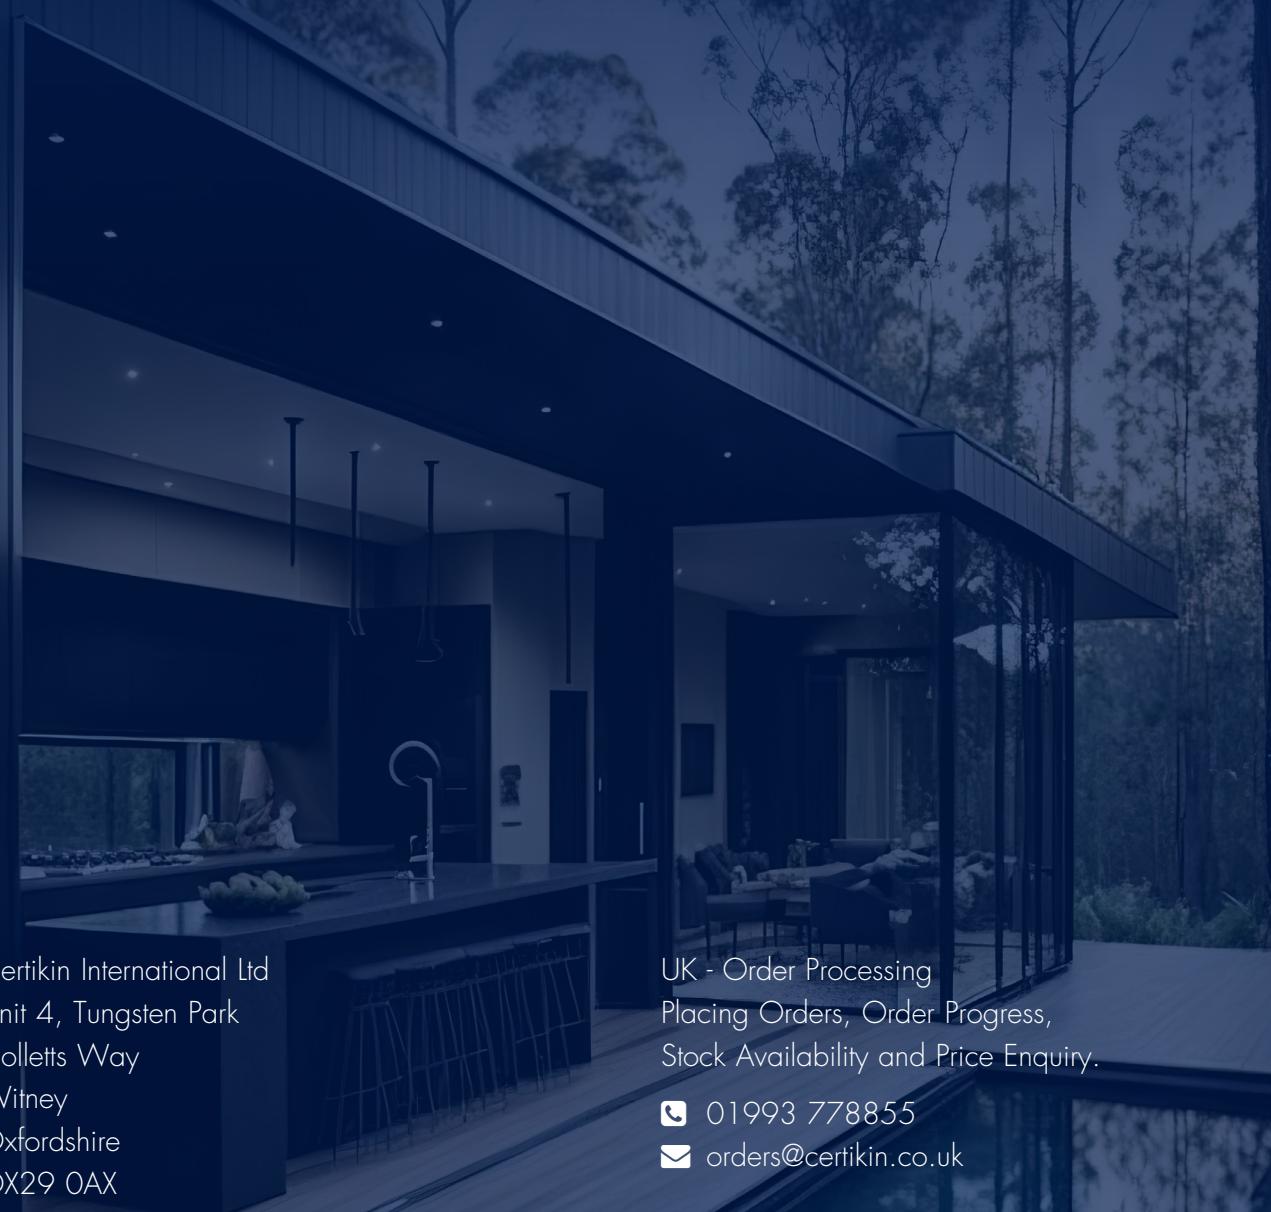

Why wait for the postman?
